State *i* and task

Task: **Add** a **note** named *"groceries"*
terms: add, note (parameters removed)

① Novelty

transition already in graph?

~~Menu~~ seen

Task A opened it here

Search — new
Setting — new
Ad — new
Delete — new
Add Note — new
Calendar — new

② Risk

can Back undo it?

~~Search~~ ✕
mode switch
~~Setting~~ ✕
mode switch
~~Ad~~ ✕
leaves the app
~~Delete~~ ✕
destructive
Add Note ✓
empty editor, Back undoes
Calendar ✓
tab, Back undoes

③ Relevance

TF-IDF with the task

query: task terms **add · note**

Add Note 0.83
own text: **add · note**
graph: same label in App 3
→ editor (title, body)

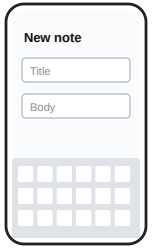

Calendar 0.05
own text: calendar
graph: same label in App 5
→ month view

IDF over screens of all apps:
menu / search / settings appear everywhere → low weight

④ Probe & record

during model reasoning

probe

Back

new state

✓ **restored**: matches State *i*

record in graph
List —Add Note→ Editor
origin: explore · rollback ✓

new probes stop when the model's action is ready

new edge + rollback result
